

Personal Injury Training Modules

Enhance your expertise in personal injury management

Our Personal Injury training modules are meticulously designed to empower Claims and Injury Management specialists with a deeper understanding and enhanced competency in managing work-related personal injury claims under the Accident Compensation legislation.

Flexible learning experience

Each topic is offered as a self-paced online learning module, complete with a downloadable workbook. This allows you to learn at your own pace while providing a valuable hardcopy reference guide. Once you feel prepared, simply log in to take the competency test. Upon successful completion, a certificate of competence will be emailed to you. These modules can be taken in any order and have no prerequisites. You will have 60 days from registration to complete them.

Who will benefit?

These courses are ideal for Claims & Injury Management (C&IM) Specialists working for Accredited Employers. On completion of each module, your certificate will demonstrate competency in the subject as required by the Accredited Employers Programme (AEP) C&IM assessment criteria.

Personal Injury Training Modules
